In 24.11.2013 JAAG, in the Hotel “Ambasadori” was implemented the training for the inspection bodies, which provide the testing of automobiles, about the validity of automobiles for the roads. The experts explained the international standard according of which there must be provided the validity of automobile.

SST ISO/IEC 17020:2010 “General Criteria for Inspection for various types of activities”.

We hereby declare that according the current condition in Georgia the testing of Automobiles is provided only for Lorry and passenger cars which provide transportation of 10 and more passengers. Testing is not provided for cars less than 10 persons. State plans to start testing of all types of transport from the 1st-March 2015.

Training was attended by all organizations in Georgia, who provide inspection of auto transport. The topic of training caused the great interest and expressed the hopes that in future the specialists will be trained for these issues.

For the great interest from private and state organization JAAG mentioned that all the persons/organizations interested for these issues provide assistance and high quality service.
